Selection Committee

To Whom It May Concern:

Yushin America has been a key partner in leading efforts to develop employer lead pipeline programs to recruit and train CNC Operators and Machinist for Rhode Island employers.

The Fast Track to CNC Manufacturing program, now in its third year, was started because of the dedication of a small group of employers, stewarded in large part by Karen Paloucci and Yushin America.

CNC Machining is a high growth potential career that is very in demand among Rhode Island manufacturers. The Fast Track program attracts talented youth and mid-career professionals who are under or unemployed into manufacturing.

Polaris MEP would not have been able to develop and implement this program without the leadership from Yushin America, and their continued support and commitment to training future Machinists both for their own company and for the larger manufacturing community in Rhode Island is remarkable.

Thank you,
